

WANTED

FRONT-END DEVELOPER

As a dynamic company with strong growth at international level, the Bricsys 24/7 team is looking for a front end developer. You will be part of our talented team of software developers and system engineers.

Your job

- Write and maintain our Bricsys 247 application which we are redesigning in Vue.js.
- We work in a small team where open communication and working together is key.
- Maintain our main website bricsys.com.

Bonus

- Typescript
- Notion of Mobile development or Nativescript, React native
- Writing tests with any test framework (Jest, Cypress)
- Canvas (WebGL, three.js)
- Basic backend notion

What knowledge do we expect?

- CSS pre- & postprocessing
- ES6
- Any modern js framework (React, Vue)
- Webpack, npm, yarn
- Git
- Responsive webdesign
- Clear and structured code (general mentality)
